

Type: Airplane Hanger
Location: San Juan, Puerto Rico
General Contractor: Alvarez Trading, Santurce, PR
Dealer: Alvarez Trading, Santurce, PR
Scope: 7,620 m² Maxxon Level-Right WearTop.

Pictures of the old epoxy floor.

When the old epoxy floor failed in this 7,620 m² hangar, it was removed and covered with 6 mm of Maxxon Level-Right WearTop. The WearTop provided a smooth floor while maintaining a slope to the drain. A chemical resistant sealer was chosen to resist the effects of skydrol spills.

Level-Right WearTop now provides a strong, smooth surface in the hangar.
