

**Type:** Government Offices  
**Location:** Puerto Rico  
**Architect:** SCF Arquitectos  
**General Contractor:** F & R Construction Corporation  
**Maxxon Dealer:** Alvarez Trading, Santurce, PR  
**Scope:** 2,900 m<sup>2</sup> Dura-Cap poured at 38-51 mm thick over Acousti-Mat LP

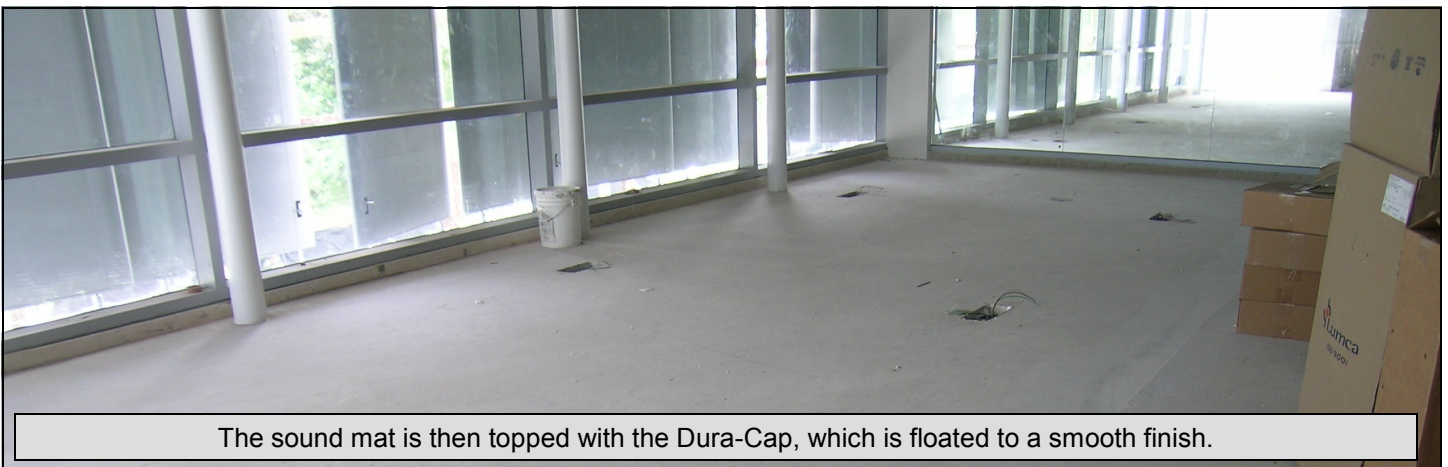

To provide a quiet separation between the courtroom and the court's library, Acousti-Mat LP was laid and then topped with Dura-Cap. The building now has a smooth hard floor and a permanent sound control system - even if floor goods are changed in the future.

Acousti-Mat LP is installed.

Isolation strips are then installed around the perimeter as well as any vertical penetration through the floor.

The sound mat is then topped with the Dura-Cap, which is floated to a smooth finish.
